

THE ULTIMATE ADVANCED SMOKE CONTROL SYSTEMS

PSB-UK Ltd leads the way in the design, manufacture and installation of the ultimate high performance smoke control systems for car parks, tunnels, residential, commercial and industrial buildings. Part of respected German fan system pioneers, the Witt & Sohn Group, PSB push the boundaries of technology to create sophisticated, future proof solutions that save lives.

PSB launched impulse ventilation systems in the UK and continue to develop unique, world-class fire detection and smoke control systems for high-profile clients across Europe and beyond. With an expanding portfolio of products, PSB offer a range of superior solutions including ductwork, cables, dampers and doors.

Dedicated to advanced design, PSB offer a total end-to-end service from concept design and guidance to completion, installation and maintenance. Trusted by leading architects, design engineers and developers, PSB create superior ventilation products and powerful, refined ductless systems, the ultimate in smoke control technology.

How PSB can assist you with your above ground Smoke Ventilation systems

PSB (UK) Ltd offers both "code compliant systems" as well as "engineered solutions" to smoke ventilation projects, working alongside Architects and Consultants as well as M&E Contractors and Building Control Officers, we provide the best possible solution to ensure the system "looks good", is "compliant", and offers "value for money". We are a company dedicated to providing the best possible smoke ventilation solutions for all types of buildings.

Recognising that we (our parents or children) could be in that building needing to make a quick and safe exit in the event of a fire ensures that the solution offered is the best available.

Design, Supply, Installation and Commissioning

PSB (UK) Ltd provides design assistance, supply, installation, commissioning and maintenance UK wide. Our full life cycle service means that at any stage during the design, construction process and ongoing life of the building, the only company responsible is ourselves thus ensuring successful completion of your project.

We offer systems that are specially developed to:-

- be near invisible in non-fire mode
- be reliable, increasing confidence in Engineered Solution designs
- reduce ongoing maintenance costs

Installation

We have an experienced and accredited team of installers covering the whole of the UK and Europe to install our systems in accordance with your build schedules.

Commissioning

All our systems are fully inspected and pre tested before dispatch and final installation. PSB own engineers will test and commission the installation against the agreed design prior to the final demonstration and hand-over.

Maintenance

Smoke ventilation systems are life saving systems and it is therefore essential that all regular preventative maintenance is carried out to the required standards by competent personnel, who are familiar with the regulatory and systems requirements.
